¹ For the baseline cohorts, the reporting units represent the individual MAOs sampled for the survey. However for the follow up cohorts, the reporting units have been adjusted to accommodate selected MAO consolidations and service area reductions at the time of performance measurement reporting (which typically occurs in the year subsequent to the collection of the follow up data).

² For the baseline cohorts, the ineligible beneficiaries met one of the following criteria: deceased; not enrolled in the MAO; had an incorrect address and phone number; had a language barrier; or were removed from the sample due to age less than 18 years. For the follow up cohorts, the ineligible beneficiaries met one of the following criteria: not enrolled in the MAO; had an incorrect address and phone number; or had a language barrier.
