Medicare Health Outcomes Survey Limited Data Sets

File Specifications for Cohort 24-25 (Plan Fields Removed)

Overview

The Medicare Health Outcomes Survey (HOS) was the first patient-reported outcomes measure used in Medicare managed care. The goal of the Medicare HOS program is to gather valid and reliable clinically meaningful data. These data have many uses, such as targeting quality improvement activities and resources; monitoring health plan performance and rewarding top-performing health plans; helping beneficiaries make informed health care choices; and advancing the science of functional health outcomes measurement. Managed care plans with Medicare Advantage (MA) contracts must participate. Medicare HOS data files available for research purposes include public use files (PUFs), limited data sets (LDSs), and research identifiable files (RIFs).

The HOS LDS files are comprised of the entire national sample for a given cohort. This includes respondents and non-respondents; senior beneficiaries (age 65 and older) and disabled beneficiaries (age 18-64); and quality reporting and voluntary reporting samples. All baseline and follow up survey items are included, as well as calculated fields; however, the reporting unit (plan contract number) information has been modified. Plan contract numbers were blinded in the LDS and certain plan level fields were removed (e.g., plan name) or modified (e.g., categorical enrollment) to prevent identification of individual health plans. Researchers who require these plan identifiers should request a RIF, as described below. The LDS retains some protected beneficiary-level health information from the RIF, such as date of birth and date of death; however, specific direct person identifiers (i.e., beneficiary name, the CMS beneficiary link key, Medicare Beneficiary Identifier [MBI], Social Security Number [SSN], phone number, and street address) are not included in the LDS files. The files are SAS¹ data sets generated with SAS Version 9.4.

A signed Data Use Agreement (DUA) with the Centers for Medicare & Medicaid Services (CMS) is required to obtain an LDS or RIF data file. All research requests for LDS files must be submitted through the CMS LDS File Process. For additional information and assistance with obtaining Medicare HOS LDS files, go to the [Research Data Files](#) section on the HOS website.

Requests for RIF data files are processed through the Research Data Assistance Center (ResDAC) at the University of Minnesota. ResDAC is the CMS contractor that provide assistance to academic, government, and non-profit researchers interested in using Medicare and/or Medicaid data. ResDAC is available to assist in the completion and/or review of requisition forms for Medicare HOS RIF data files prior to their submission to CMS. For more information about obtaining the RIFs, please visit the [ResDAC HOS](#) web page.

¹ SAS® is a registered trademark of the SAS Institute Inc., Cary, NC.

ResDAC may also be contacted by calling (888) 9RESDAC (888-973-7322) between the hours of 8am to 4pm CT Monday through Friday or by emailing resdac@umn.edu.

Medicare HOS Versions

The 2021-2023 Cohort 24 through 2022-2024 Cohort 25 were collected with the HOS 3.0 at baseline and follow up. The HOS version 3.0 is based on the Veterans RAND 12-Item Health Survey (VR-12). The 12-item health survey portion (questions one [Q1] through seven [Q7]) was used to calculate the physical component summary (PCS) and mental component summary (MCS) scores at baseline and follow up. The HOS 3.0 included new questions about instrumental activities of daily living (IADLs), memory problems, pain, and living arrangements; and revised questions on race, Hispanic ethnicity, primary language, sex, and disability status that were introduced in 2013. In 2015 the HOS 3.0 also added questions about the average number of hours of sleep during the past month, overall sleep quality over the past month; and revised questions about leaking of urine changing daily activities or interfering with sleep, and the language mainly spoken at home. During the 2021 fielding, the osteoporosis testing question was removed from the questionnaire. During the 2022 fielding, five questions were removed, including three chronic conditions, a question about smoking status, and a question about annual household income. In 2022, the following chronic condition questions were removed, reducing the number from 15 to 12: arthritis of the hip or knee, arthritis of the hand or wrist, and sciatica. Additionally, the question about the language mainly spoken at home was revised to add Russian language as category (4) and Some other language, formerly category (4), as category (7).

LDS Structure

Fields in the LDS files were collected at three different time points: baseline, follow up, and performance measurement. The information from all three time points was merged into one observation per beneficiary, and a prefix assigned to each field name to identify the time point. All fields obtained or derived from the baseline survey have a “B” prefix, all fields obtained or derived from the follow up survey have an “F” prefix, and all performance measurement fields, which were calculated or retrieved from other data sources, have a “P” prefix. The performance measurement fields provide characteristics of the beneficiary and the beneficiary’s health plan at the time of performance measurement reporting, which occurs approximately one year after follow up data collection.

There are two fields (BxHOSQRS, FxHOSQRS) that identify Fully Integrated Dual Eligible Special Needs Plan (FIDE SNP) benefit packages (PBPIDs) which are voluntarily reporting HOS for calculation of the frailty adjustment factor based on the six activities of daily living (ADLs) in the HOS. At baseline, BxHOSQRS=1 for beneficiaries in MAOs that are part of the quality reporting sample and BxHOSQRS = 0 for beneficiaries in MAOs that are voluntarily reporting HOS for frailty assessment only. In the field names above, and elsewhere in this document, the “x” following the prefix represents the cohort identifier (24 or 25).

LDS File Specifications Table Description

The File Specifications Table in this document describes the file layout by field position for Cohorts 24 through 25 LDS files. The table has one row per field. The columns provide the field name/description, type, length, and additional information (including valid values where applicable). There are also columns to indicate the included fields for each cohort: **B24F24** for Cohort 24 and **B25F25** for Cohort 25. The survey question number is printed in the corresponding row under the column heading if the question was asked. Check marks in this column indicate the presence of non-survey items, such as administrative and analytic fields. Shaded rows indicate fields which were removed to prevent identification of individual health plans.

The question text, valid values, and skip patterns in this document are from the most recent HOS questionnaire in which the question appears, unless otherwise noted. The exact text of each question for each survey year can be found in the HOS survey instrument, which can be downloaded from [NCQA's website](#). Additional information may be found in the *HEDIS® Volume 6: Specifications for the Medicare Health Outcomes Survey*. The most recent HEDIS Volume 6 manuals are available at no cost from the [NCQA Store](#). Copies of older editions of HEDIS® publications may be obtained by calling NCQA Customer Support at (888) 275-7585.²

The field name and attributes in the LDS File Specifications Table correspond to the Cohorts 24 through 25 LDS files only and may differ from previous LDS files derived from the HOS 1.0, 2.0, and 2.5. The File Specifications documents for all prior HOS cohorts are available in the [Research Data Files](#) section on the HOS website.

Summary of LDS Files

	2021 Cohort 24 Baseline	2023 Cohort 24 Follow Up	2022 Cohort 25 Baseline	2024 Cohort 25 Follow Up
HOS Version	3.0	3.0	3.0	3.0
No. of Survey Questions	67	62	62	62

Summary of Blinded LDS File Numbers

	Cohort 24	Cohort 25
No. of Observations	928,077	1,013,279
No. of Fields	374	369

Additional information pertaining to the cohorts covered by this document, such as MAO participation and sampling selection, may be found in the Baseline and Performance Measurement Data Users Guides in the [Data Users Guides](#) section on the HOS website. The *Quality Assurance Guidelines and Technical Specifications* can be downloaded from the Technical Reports section of the [Methodology](#) page on the HOS Website. A [Glossary](#) consisting of definitions relevant to the HOS may also be accessed from links at the bottom of site webpages. Questions related to the LDS fields may be directed to Medicare HOS Information and Technical Support at hos@hsag.com or (888) 880-0077.

LDS File Specifications Table (Plan Fields Removed)
